Email: jacobshen.js25@gmail.com

Mobile: (858) 888-2163

Location: Greater Seattle Area, WA

## EXPERIENCE

---

### • **SonderMind**

Remote/Denver, CO

*Senior Applied Scientist*

*Mar 2023 - Present*

- Designed and implemented AI Concierge (Chatbot) using OpenAI GPT models and a custom Retrieval Augmented Generation (RAG) system. Integrated MongoDB and PostgreSQL to deliver personalized care journeys, boosting client engagement and care efficiency.
- Architected an innovative AI-driven paid search optimization system integrating LLMs for ad keyword generation, Reinforcement Learning for bid optimization, and a topic-based predictive model for evaluation; Resulted in a 35% increase in marketing ROI through improved ad placements and data-driven keyword strategies.
- Developed and deployed a hybrid Similarity and Reinforcement Learning-based Recommendation Service to deliver personalized content via the mobile app, enhancing care efficiency and increasing user engagement by 25%.
- Pioneered the development of tooling for continuous, reproducible, and automated deployment of Machine Learning (ML) models and services via AWS, employing CI/CD pipelines, Docker containers, and Kubernetes for scalable and efficient ML operations.

### • **Mindstrong** (acquired by SonderMind)

Remote/San Francisco, CA

*Senior Applied Scientist*

*May 2022 - Mar 2023*

- Researched and deployed advanced Machine Learning algorithms to enhance Behavioral Healthcare Technology Services, leading to the implementation of personalized, measurement-based care frameworks.
- Developed and deployed a Recommender System using Collaborative Filtering and Latent Factor Models to optimize content recommendations, enhancing personalized care and improving user engagement.
- Designed and deployed a Model-Assisted Behavioral Healthcare system, integrating predictive models with clinical decision-making processes to enhance session efficiency and patient triage.

### • **Fred Hutchinson Cancer Center**

Seattle, WA

*Senior Research Statistician*

*Nov 2018 - Apr 2022*

- Led the application of advanced Statistical and Machine Learning techniques to longitudinally evaluate treatment effects using patient data from clinical trials, fitness tracking, and electronic health records, enhancing the accuracy of patient outcome predictions.
- Developed automated Machine Learning pipelines for robust data preprocessing and feature extraction, facilitating the lab's transition from purely experimental research to incorporating computational techniques.

### • **UC San Diego Health**

La Jolla, CA

*Statistician / Research Manager*

*Sep 2015 - Oct 2018*

- Headed the statistics unit within the Head & Neck Clinical and Translational Research Lab, driving the strategic application of statistical analyses in clinical research, resulting in the publication of research papers.
- Implemented Machine Learning algorithms and Data Visualization techniques using R and Python to analyze medical image data and large-scale clinical trial data, yielding critical insights for clinical decision-making, leading to the improvement in treatment plans.
- Authored research manuscripts and effectively communicated complex statistical findings to a diverse range of stakeholders, enhancing the impact and reach of research outcomes.

## EDUCATION

---

### • **University of California San Diego**

La Jolla, CA

*M.S. in Statistics / Ph.D. in Biostatistics (not completed)*

*2018*

### • **Xiamen University**

Xiamen, China

*B.S. in Computational Mathematics*

*2013*

## SKILLS

---

- **Languages & Tools:** Python, Java, LLMs (ChatGPT, LlamaIndex, Langchain), API Development (FastAPI, Falcon), AWS (SageMaker, EC2), PyTorch, Tensorflow, Docker, Kubernetes
- **Expertise:** LLM Applications, Bayesian Statistics, Reinforcement Learning, Deep Learning, Anomaly Detection, Experimental Methods
