

Jacob Shen

858-888-2163 | jacobshen.js25@email.com | linkedin.com/in/jacob-shen | researchgate.net/profile/Jacob-Shen | Seattle, WA

TECHNICAL SKILLS

Languages & Tools: Python, Java, LLMs (ChatGPT, LlamaIndex, Langchain), API Development (FastAPI, Falcon), AWS (SageMaker, EC2), PyTorch, Tensorflow, Docker, Kubernetes, CI/CD Pipeline

Expertise: LLM Applications, Bayesian Statistics, Reinforcement Learning, Deep Learning, Anomaly Detection, Experimental Method

EXPERIENCE

Senior Applied Scientist

SonderMind

Remote/Denver, CO

Mar 2023 – Present

Designed and implemented AI Concierge (Chatbot) using OpenAI GPT models and a custom Retrieval Augmented Generation (RAG) system. Integrated MongoDB and PostgreSQL to deliver personalized care journeys, boosting client engagement and care efficiency.

Architected an innovative AI-driven paid search optimization system integrating LLMs for ad keyword generation, Reinforcement Learning for bid optimization, and a topic-based predictive model for evaluation; resulted in a 35% increase in marketing ROI through improved ad placements and data-driven keyword strategies.

Developed and deployed a hybrid Similarity and Reinforcement Learning-based Recommendation Service to deliver personalized content via the mobile app, enhancing care efficiency and increasing user engagement by 25%.

Pioneered the development of tooling for continuous, reproducible, and automated deployment of Machine Learning (ML) models and services via AWS, employing CI/CD pipelines, Docker containers, and Kubernetes for scalable and efficient ML operations.

Senior Applied Scientist

Mindstrong Health (acquired by SonderMind)

Remote/San Francisco, CA

May 2022 – Mar 2023

Researched and deployed advanced Machine Learning algorithms to enhance Behavioral Healthcare Technology Services, leading to the implementation of personalized, measurement-based care frameworks.

Developed and deployed a Recommender System using Collaborative Filtering and Latent Factor Models to optimize content recommendations, enhancing personalized care and improving user engagement.

Designed and deployed a Model-Assisted Behavioral Healthcare system, integrating predictive models with clinical decision-making processes to enhance session efficiency and patient triage.

Senior Research Statistician

Fred Hutchinson Cancer Center

Seattle, WA

Nov 2018 – Apr 2022

Led the application of advanced Statistical and Machine Learning techniques to longitudinally evaluate treatment effects using patient data from clinical trials, fitness tracking, and electronic health records, enhancing the accuracy of patient outcome predictions.

Developed automated Machine Learning pipelines for robust data preprocessing and feature extraction, facilitating the lab's transition from purely experimental research to incorporating computational techniques.

Statistician / Research Manager

UC San Diego Health

La Jolla, CA

Sep 2015 – Oct 2018

Headed the statistics unit within the Head & Neck Clinical and Translational Research Lab, driving the strategic application of statistical analyses in clinical research, resulting in the publication of research papers.

Implemented Machine Learning algorithms and Data Visualization techniques using R and Python to analyze medical image data and large-scale clinical trial data, yielding critical insights for clinical decision-making, leading to the improvement in treatment plans.

Authored research manuscripts and effectively communicated complex statistical findings to a diverse range of stakeholders, enhancing the impact and reach of research outcomes.

EDUCATION

University of California San Diego

M.S. in Statistics / Ph.D. in Biostatistics (not completed)

La Jolla, CA

2018

Xiamen University

B.S. in Computational Mathematics

Xiamen, China

2013
